PROFILE

Web developer and designer who builds and redesigns fast, mobile-first websites that look credible and turn visits into enquiries, with a specialist focus on fintech and crypto interfaces. Three years of mentored training in web development, graphic design, photo editing and video, now running my own studio, Kasim Elite Digital Global. I take every project end to end — first call, fixed quote, design, code and launch — and clients work with me directly.

CORE SKILLS

Web development	HTML5, CSS3, JavaScript, responsive mobile-first layouts, web accessibility (WCAG AA), GitHub, Vercel deployment
Design	Website and landing page design, fintech & crypto UI/UX, design systems, brand identity, graphic design
Motion & video	AI video creation, motion design, video editing, photo editing and retouching
Growth & content	SEO basics, Google Analytics, copywriting, AI-assisted multilingual translation, social media campaigns
AI & automation	Prompt engineering, AI workflows and automation, AI image and video tools
Tools	Figma, Canva, GitHub, Vercel, Selar

EXPERIENCE

Founder, Web Developer & Designer | Kasim Elite Digital Global 2025 – Present

Founder-led digital studio · Port Harcourt, Nigeria · remote

- Designed, hand-coded and deployed kasimempire.com, a six-page studio website with a digital product store, using HTML, CSS and JavaScript with GitHub and Vercel.
- Created the studio's design system — black, gold and blue palette, type scale and reusable components — and built an accessible front end with skip links, keyboard navigation, reduced-motion support and AA-contrast text.
- Delivered photo editing, image creation and AI video work for individual clients.
- Offer website redesign, new website builds and fintech interface design to businesses worldwide, with fixed quotes, clear updates and agreed deadlines.

Apprentice — Web Development, Graphic Design & Video 3 years

Mentored training under an experienced practitioner

- Learned web development, graphic design, photo editing and video production through hands-on practice on real work.

SELECTED WORK

- kasimempire.com** — studio website and store, designed and coded from scratch, with live CSS animations and interface mockups.
- Fintech & crypto UI concepts** — exchange order book, multi-currency wallet and a fintech design system, presented as labelled concept work.
- AI films & retouching** — website advert, AI keynote, AI transformation, space and Mars films; before-and-after portrait retouching.
- Author** — “How to Make Money with AI”, an ebook published and sold on Selar.
