PROFILE

Web developer and designer who builds premium websites and redesigns for real estate, automotive, fintech, crypto and growing businesses. Three years of mentored training in web development, graphic design, photo editing and video, now running my own studio, Kasim Elite Digital Global (KEDG). I take every project end to end, from first call and fixed quote to design, build and launch, and clients work with me directly. My work includes five interactive website concepts anyone can click through.

CORE SKILLS

Web development	HTML5, CSS3, JavaScript, responsive mobile-first layouts, web accessibility (WCAG AA, reduced-motion support), GitHub, Vercel deployment
Website types	Business and corporate websites, real estate and automotive sites, landing pages, startup and portfolio sites, e-commerce stores, website redesigns
Interactive features	Photo galleries and slideshows, inventory filters, finance and mortgage calculators, booking and enquiry forms, shipment tracking
Design	Website and UI/UX design, fintech & crypto interfaces, design systems, brand identity, graphic design
Motion & video	Interface motion, AI video creation, motion design, video editing, photo editing and retouching
Growth & content	SEO basics, Google Analytics, copywriting, AI-assisted multilingual translation, social media campaigns
AI & automation	AI-assisted development, prompt engineering, AI workflows and automation, AI image and video tools
Tools	Figma, Canva, Lovable, Claude, GitHub, Vercel, Selar

EXPERIENCE

Founder, Web Developer & Designer · Kasim Elite Digital Global (KEDG) **2025 – Present**

Founder-led digital studio · Port Harcourt, Nigeria · remote

- Designed, built and launched kasimempire.com: a studio website with a cinematic project showcase, a digital product store and enquiry flows, deployed with GitHub and Vercel.
- Built five interactive website concepts, each labelled as a concept: a car showroom (Aureon Motors), a premium property site (Palmstone Estates), a logistics site with shipment tracking (Dunemark), a fintech dashboard (Vaultra) and a crypto landing page (NexaCoin).
- Built vehicle and property galleries with smooth zoom, Previous/Next navigation, finance and mortgage calculators, and booking forms, tested on mobile and desktop with reduced-motion support.
- Created the studio's design system (black, gold and blue palette, type scale, reusable components) and an accessible front end.
- Built and sell digital products (guides, templates and brand kits) through a store on Selar, linked from kasimempire.com.
- Offer website audits ($120), redesigns (from $300) and full builds (from $1,200) with fixed quotes, written updates and client approval at every stage.

Apprentice & Freelance Designer · Web Development, Graphic Design & Video **3 years**

Mentored training under an experienced practitioner

- Learned web development, graphic design, photo editing and video production through hands-on practice on real work.
- Served 50+ clients in photo editing, video editing and graphic design: logos, posters, banners, brochures and invitation cards.

SELECTED WORK

Aureon Motors Interactive concept — luxury car showroom with featured-vehicle gallery, vehicle-to-vehicle navigation, inventory filters, finance calculator and test-drive booking. kasimempire.com/demos/aureon

Palmstone Estates Interactive concept — premium property site with photo listings, close-up galleries, mortgage calculator, shortlist and viewing requests. kasimempire.com/demos/palmstone

Dunemark Interactive concept — logistics company site with animated shipment tracking, quote form and WhatsApp contact. kasimempire.com/demos/dunemark

Vaultra Interactive concept — fintech banking dashboard with balances, spending charts, virtual cards and quick send. vaultra-dashboard-kedg.lovable.app

NexaCoin Interactive concept — crypto exchange landing page with price ticker, security proof and fee table. nexacoin-landing-kedg.lovable.app

kasimempire.com Live build — studio website and store with a cinematic showcase of all five concepts. kasimempire.com

AI films & retouching — website advert, AI transformation, space and Mars films; before-and-after portrait retouching.

Author — “How to Make Money with AI”, an ebook published and sold on Selar.

Concepts use fictional brands and sample data, and AI-generated imagery is labelled.
